

The CC Euro Rollcontainer is a low-noise load carrier...

...perfect for quiet, night-time deliveries.

CC Euro Rollcontainer

The two-sided roll cage for low-noise deliveries

Low-noise deliveries

The CC Euro Rollcontainer has been designed specifically with noise and weight reduction in mind. The result is a two-sided transport item that is ideal for the efficient picking, packing and distribution of consumer products from distribution centres to retailers. Tests by TNO (Netherlands Organization for Applied Scientific Research) confirm that the CC Euro Rollcontainer emits below 60 dB(A) when in use. It therefore qualifies for the Dutch **PIEK certificate** and may be used for quiet, night-time deliveries.

Night-time distribution benefits

Being able to distribute goods at night-time can help reduce daytime road congestion and therefore it can help improve journey times and fuel economy for transporters, improve stock turn-around, and reduce CO₂ and NO_x emissions locally.

Easy handling and storage

The CC Euro Rollcontainer has a lift-up hinged base and swing-back sides that allow for easy nesting in order to economise return logistics and storage. When fully loaded, the CC Euro Rollcontainer can be secured with adjustable straps to make sure that the goods stay safely inside. The straps can be easily released. The CC Euro Rollcontainer can be handled manually or with automatic lifting equipment such as a pallet or forklift truck.

CC Euro Rollcontainer

The two-sided roll cage for low-noise deliveries

Specifications: CC Euro Rollcontainer

External dimensions (LxWxH)	811 x 664 x 1903 mm
Internal dimensions (LxWxH)	811 x 620 x 1653 mm
Handling height / width	176 / 570 mm (on the long side)
Weight	34.5 kg
Materials	Deck: black PP plastic with a steel frame Sides: steel Wheels: elastic-vulcanised rubber
Carrying capacity	400 kg UDL*
RFID** labels	UHF Class 1 Gen 2
Temperature range	-30°C to +70°C
Certifications	PIEK certified

*UDL: Uniformly Distributed Load

**RFID: Radio Frequency Identification

What you get with the CC Euro Rollcontainer:

- 1 Developed for efficient picking, packing and distribution of consumer products** from distribution centres to retailers.
- 2 Low-noise wheels** – maximum 60 dB(A). The CC Euro Rollcontainer fulfils the Dutch PIEK criteria for maximum noise levels for quiet night-time deliveries.
- 3 Easy to handle.** The low-weight plastic deck and swivel wheels make the CC Euro Rollcontainer ergonomically friendly.
- 4 High-quality, long-lasting load carrier.** The steel reinforcements under the deck create a strong and stable product with low repair and maintenance costs. It can carry an evenly distributed load of 400 kg.
- 5 European standard dimensions.** With an internal footprint corresponding to a ½ Euro Pallet, the CC Euro Rollcontainer fits with standard European modular packaging.
- 6 RFID labels.** The deck has 2 x passive RFID labels to facilitate registration and Track & Trace in product flows from producer to retailer.
- 7 Nestable.** Push the base into a vertical position to nest the CC Euro Rollcontainer. This reduces storage volume significantly for the return transport.
- 8 Recyclable components.** All parts can be recycled.
