

CC Low Noise Dolly CC Low Noise Rolly

The low-noise rolling pallets in steel

High-quality pallets on wheels – for modular packaging

The CC Low Noise Dolly (rolling $\frac{1}{4}$ pallet) and CC Low Noise Rolly (rolling $\frac{1}{2}$ pallet) have been developed especially for transporting modular packaging (crates, cardboard boxes, plastic trays for bottled drinks etc.) and match all European standard measures. The $\frac{1}{4}$ pallet can carry up to 200 kg and the $\frac{1}{2}$ pallet can carry up to 400 kg. To ensure protection from corrosion, the rolling pallets are made from hot dip galvanised steel and can be used or stored at temperatures ranging from -30°C to $+70^{\circ}\text{C}$.

Can roll directly to the supermarket floor

The discreet construction of the pallets make them perfect carriers of in-store displays. With the narrow profile in height they are almost unnoticeable, so your products will be the eye-catchers – not the pallets. And with everything moving on wheels, your products can be rolled directly into the store from the backroom by one person alone – even without lifting equipment. The rounded corners provide safety in use and make it easy to position.

Low-noise deliveries

Tests by TNO (Netherlands Organization for Applied Scientific Research) confirm that both pallets emit below 60 dB(A) when in use. They therefore qualify for the Dutch **PIEK certificate** and may be used for quiet deliveries in areas with nighttime noise restrictions.

Specifications CC Low Noise Dolly:

Size	External	Internal - Accommodation for one stack of crates at:
Length	603 mm	600 mm
Width	403 mm	400 mm
Height	152 mm	
Weight	7.5 kg	
Carrying capacity	200 kg UDL*	
Certifications	PIEK certified	

Specifications CC Low Noise Rolly:

Size	External	Internal - Accommodation for two stacks of crates each:
Length	811 mm	400 mm
Width	605 mm	600 mm
Height	182 mm	
Weight	13.3 kg	
Carrying capacity	400 kg UDL*	
Certifications	PIEK certified	

*UDL: Uniformly Distributed Load

CC Low Noise Dolly CC Low Noise Rolly

The low-noise rolling pallets in steel

What you get with the CC Low Noise Dolly and CC Low Noise Rolly:

- 1 Developed for transporting modular packaging** – crates, cardboard boxes, plastic trays for bottled drinks etc.
- 2 Works with all other transport items of European standard dimensions.** The internal dimensions correspond to a $\frac{1}{4}$ Euro Pallet and a $\frac{1}{2}$ Euro Pallet.
- 3 Low-noise wheels** – maximum 60 dB(A). The CC Low Noise Dolly and CC Low Noise Rolly fulfil the Dutch PIEK criteria for maximum noise levels for quiet night-time deliveries.
- 4 Extra product protection.** The external proportions are wider than the internal, providing space to protect the carried products.
- 5 Ideal as a retail display carrier.** Discreet construction makes your products the eye-catchers – not the load carriers. The pallets can be rolled directly into the store.
- 6 Safe to use.** Smooth rounded corners provide safety in use and make it easy to position. They match the rounded corners of the CC Freshbox and the CC Eurocrate.
- 7 Can endure dramatic changes in temperatures.** It can be used, stored or washed from -30° to $+70^{\circ}$. The shape and dimensions of the load carriers will remain unchanged.
- 8 Ensures a cost-efficient return flow.** For return logistics, the CC Low Noise Dolly and CC Low Noise Rolly are stackable, and the unique design ensures that a stack will not slide.
- 9 A durable construction ensures perfect product safety.** Made from hot dip galvanised steel to ensure protection from corrosion.
